** For Title III, the Cost Share percentage is based on the gross annual/monthly income of the qualifying older person(s) and is translated into a percentage of Federal Poverty Guidelines and the cost of the service unit and/or amount of a self-directed services budget. It does not consider any assets, savings or other property owned by the older person(s). A sample service price of \$20 is used as an example. Title III funded projects will customize this Cost Share sliding scale and reflect actual service unit price.*

The monthly income figures are based on the 2018 Federal Poverty Guidelines published in the Federal Register on January 13, 2021.
